

[Applications] Used to support underground power cables and junction boxes in a manhole.

[Specifications]

- A pole brace to support cables and junction boxes
- A brace is affixed to a cable support and a support insulator is installed on the brace to support a cable.
- A steel cable support is adopted.
- A structure in which the length of the cable support can be fine-adjusted depending on the location of installation (the height in the manhole) by using the adjusting bolt and nut at the tip of the cable support.

Constituent materials

Parts	Material	Applicable standard (JIS)	Specifications
Main body	Carbon steel pipe	G3444 Structural steel pipe	STK400
Corrosion prevention	Hot-dip galvanizing	H8641 Hot-dip galvanizing	2nd class 55
	Epoxy resin paint	K5551 Heavy-duty anti-corrosive paints for metal structures	Class C No.1, 2
